HOW TO MATCH PRINTS ON SEAMS EASILY

Supplies: EZ-Steam Fusible Tape, Iron, Sewing Machine, Fabric

★ Apply sticky side of EZ-Steam Fusible Tape to one piece of fabric. Stick it to the right side of fabric, along seamline edge. Peel off tape backing.

★ Place the adjoining piece of fabric on top, matching design carefully. Lightly press the two sides together with fingers. Open fabric carefully to make sure seams match. If not, peel up fabric and move as needed.

★ Once the fabric is aligned, press with an iron using plenty of steam to set the fusible tape. (You will not be able to readjust the fabric once you iron the tape). Sew the seam. Give your seam a final press and admire your matched fabric.
